

Press Release

EV Expo, 14th July 2024

REPOWER SHOALHAVEN is running an EV Expo Day on Sunday 14th July. The event will take place at the Huskisson Market on the Huskisson Sportsground, Kioloa Street Huskisson from 8am till 2.00pm.

People will have the opportunity to:

- Learn about EV models available in Australia today
- Talk to local owners of 4 EV models (including Tesla, Hyundai Ioniq and MG4)
- Chat about EV charging and use of home solar power
- Discuss savings and costs and the advantages of EV ownership

There are so many benefits to driving an electric car: significantly lower emissions, much cheaper to run and maintain, fun to drive, cleaner air and quieter neighbourhoods

Local owners of EVs will be on hand to talk about their choice of EV and what it is like to own one in the Shoalhaven.

Most new EVs can do over 350 kms on a full charge, and the average kms driven per day is only 33 kms, and you can top that up overnight.

Plus there are more and more EV chargers being built all the time - check out Plug Share maps in your area [<https://www.plugshare.com/>].
